

## **Fertagus presents its Charter of Principles for a Sustainable Mobility!**

In the context of the initiatives developed by Fertagus to mark the European Mobility Week, the company presents today, the 16th of September, a Charter of Principles that is based on five strategic landmarks and defines its commitment to sustainable management.

This document is the result of extensive consultation with various external bodies, specialists and groups of employees and aims at bringing together a series of guidelines for the company's sustainability policy. Developed with the client in mind and an emphasis on the quality of the services it provides, Fertagus' sustainability strategy supports high safety standards, encourages and motivates team work, and favours both environmental protection and practices that enhance energy efficiency.

Finally, it strengthens its involvement with the community through its policy of increasing awareness, respect for citizenship and social inclusion.

The Charter of Principles will be presented at Pragal station on the 16<sup>th</sup> September. Several representatives of various institutions, local authorities and other entities in the sector or connected with this project will attend the event.
